

# Commercial Distributor Systems

Clack® 

# **OPERATING SPECIFICATIONS**

This literature booklet contains items made by Clack Corporation,  
Plastomer a Division of KSH GMBH in Germany.

## **OPERATING SPECIFICATIONS FOR CLACK ITEMS:**

Operating Pressures 20-125 psi / 138-862 kPa  
Temperature Ranges 40-110°F / 4-43°C

## **OPERATING SPECIFICATIONS FOR PLASTOMER ITEMS:**

Operating Pressures with flanged tank adapters 150 psi / 1,034 kPa  
Maximum Operating Temperature 140°F / 60°C

**BECAUSE OF THE DIVERSITY OF WATER SOFTENERS AND FILTER APPLICATIONS (INCLUDING, BUT NOT LIMITED TO, PRESSURE DROP, FLOW RATE, AND BACKWASH RATE PER SQUARE FOOT), CLACK'S LIABILITY IS LIMITED TO THE REPAIR OR REPLACEMENT OF DEFECTIVE GOODS, PROVIDED THAT THE SAME ARE RETURNED TO CLACK FOR REPAIR OR REPLACEMENT. THE WARRANTY FOR DISTRIBUTOR SYSTEMS IS 1 YEAR. CLACK GIVES THIS WARRANTY TO OEM IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE AND HEREBY EXPRESSLY DISCLAIMS ALL OTHER SUCH WARRANTIES. CLACK'S LIABILITY HERE UNDER SHALL NOT EXCEED THE COST OF THE PRODUCT. UNDER NO CIRCUMSTANCES WILL CLACK BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES OR FOR ANY OTHER LOSS, DAMAGE OR EXPENSE OF ANY KIND, INCLUDING LOSS OF PROFITS, ARISING IN CONNECTION WITH THE INSTALLATION OR USE OR INABILITY TO USE THE SYSTEM.**

# Stack Distributors for Top Mount Valves

Clack bottom stack distributors are designed primarily for use with top mount water softeners or filter valves. The stack distributors are comprised of individual ABS segments which are held together with 18-8 stainless steel screws. The segmented stack has the ability to open up when backwashed, removing any fines that might accumulate on the distributor. The standard slot size is .010 - .013. Clack bottom stack distributors are designed for use with 14" - 36" diameter fiberglass mineral tanks with a 4" - 6" top openings. The bottom stack distributors are designed to accommodate a number of different size riser pipes which can be solvent welded or threaded directly into the stack. There is no stack distributor assembly required. To install, solvent weld or thread the riser pipe directly into the distributor and extend the distributor to the bottom of the mineral tank.

# Top Distributors for Top Mount Valves

The Clack top stack distributors, diffusers and baffle diffusers are designed to be used in conjunction with the Clack WS1.5 and WS2, the Pentair Magnum CV™ and the Fleck 2850, 9500, 2900 and 3150 Control Valves. The stack and baffle diffusers are designed to diffuse or break up the inlet water flow when the top stack distributor is not used. The top stack distributors, diffusers and baffle diffusers are designed to accommodate a 1.5", 50mm, 2" or 63mm PVC riser pipe. Installation is accomplished by simply pinning or screwing in the top stack distributor and diffuser or snapping the top baffle diffuser directly inside the control valve.

# Top Baffle Assemblies

Clack's top baffle assemblies are designed for side mount valve application. Promotes even distribution of water flow, and helps to prevent channeling through the media bed.

# Stack Distributors for Side Mount Valves

The stack distributor assemblies are designed to be used interchangeably as either top or bottom distributors. The distributor assemblies consist of a segmented stack distributor, 4"-8 adapter, and a 2" CPVC socket elbow or 6" Flange Adapter only. The segmented distributor has the ability to open up when backwashed, removing any possible fines that might accumulate on the distributor. The top and bottom assemblies are designed for use with 14" - 63" diameter fiberglass mineral tanks. Assembly is quick and simple. Installation is accomplished by simply threading or bolting on the complete distribution assembly directly in the top or bottom opening of the mineral tank.

| ORDER NUMBER | DESCRIPTION                                | TANK OPENING |

| DKSTSF3-HF   | KSH High Flow Stack Distributor 3" thread  | 6" Flange    |

# Hub and Lateral Series for Top Mount Valves

Clack top mount hub and lateral systems are designed primarily for use with top mount water softeners or filter valves. The top mount hub and lateral series is designed to accommodate 14" - 36" diameter fiberglass mineral tanks with 4" - 6" top openings. The top mount hub and lateral series consists of an ABS hub and 8-PVC slotted laterals with 3/4" threaded adapters. The hub is available with a number of openings to accommodate different riser pipe diameters. To install, simply solvent weld or thread the riser pipe into the hub and insert it into the tank through the top opening. Thread the laterals into the hub and extend the hub and laterals to the bottom of the mineral tank.

| ORDER NUMBER | DESCRIPTION                | TANK DIAMETER | RISER OPENINGS AVAILABLE * | EXAMPLE   |

# 2" Solvent Bottom Mount Hub and Lateral Series

Clack hub and lateral distributor systems are designed specifically to fit into a 4" bottom mineral tank opening. The hub and lateral series is designed for use in 14"-36" diameter fiberglass mineral tanks. The hub and lateral series consist of a polypropylene hub, six (6) polypropylene laterals with 3/4" threaded adapters, 4"-8 adapter and 2" CPVC socket elbow. Installation is quick and simple with the use of the 1/2"-13 threaded stud molded right into the top of the hub. For installation, simply thread a long 1/2" rod onto the 1/2" stud on the hub, extend through the top of the tank to the bottom and thread the laterals into the hub from the bottom of the tank. After installing the 4"-8 adapter and threading the 2" CPVC socket elbow into the hub, simply unthread the 1/2" rod.
